Objective

Motivated C# Developer seeking an opportunity to apply my skills in C#, .NET, Windows Forms, object-oriented programming, and database development. I aim to contribute to building reliable, efficient, and user-friendly software applications while continuously improving my programming and software development skills.

Experience

- **Sudanese Standards and Metrology Organization** 2022 - 2023
  Secretary
  Worked in a professional administrative environment, handling documentation, data organization, records, and office-related tasks. Developed strong attention to detail, problem-solving, organization, and communication skills while working with computer-based systems and digital documents.

- **IEEE University of Gezira Student Branch (IEEE UofG SB)** 2023 - 2025
  HR Volunteer & Technical Support Officer
  Worked as a volunteer in the Human Resources Team and was responsible for Technical Support activities. Provided technical assistance to the team, supported digital tools and platforms, and helped solve technical issues related to team operations and volunteer activities.

- **Google Developer Club** 2023 - 2024
  Technical Team Member
  Participated as a member of the Technical Team, contributing to technical activities, supporting technology-related events, and developing practical technical and problem-solving skills.

Education

- **Wad-Madni Al-Ahlia University** 2021
  Bachelor of Science in Computer Science
  Good

- **University of Gezira**
  Postgraduate Diploma in Computer Science

Skills

- Programming Languages C# — Intermediate VB.NET — Intermediate Java — Intermediate Python — Beginner/Intermediate
- .NET Development C# / .NET .NET Framework 4.7.2 Windows Forms (WinForms) Object-Oriented Programming (OOP) LINQ Desktop Application Development
- Database SQL Server SQLite Microsoft Access SQL Database Design CRUD Operations
- Software Development Data Structures & Algorithms Debugging & Troubleshooting Problem Solving Software Design User Interface Development API Integration Git / GitHub
- Development Tools Microsoft Visual Studio 2019 Microsoft Visual Studio 2010 SQLite Database Browser SQL Server

Projects

- **PC Maintenance Management System**
  A desktop application developed using C# and Windows Forms to manage PC maintenance operations. The system is designed to organize maintenance records, manage computer information, and store related data using a database.

- **Medicine Warehouse Management System**
  A desktop management system designed to organize and manage medicine warehouse operations. The system focuses on managing medicine information, inventory records, and database operations to improve organization and accessibility of warehouse data.
